

KYLIE STEWART

WEB DEVELOPER

SKILLS

Frameworks: JavaScript, React.js, Node.js, JavaScript, HTML5, CSS3, Angular.js

Libraries: auth0, firebase, express.js, gulp

Back-end: PostgreSQL

Other: agile, git

PROJECTS

Locus News Aggregator Group Developed Web App

October 2017

<https://locus-news.firebaseio.com/>

- Front-end design features include parallax and onHover elements
- Used ML.NaiveBayes to “learn” user preferences based on interaction and pre-determined categories
- Utilized axios for multiple asynchronous news source API calls

Universal List Personally Developed Native and Web App

September 2017

<https://list-it.now.sh/> — not yet available in the app store

- Learned React-Native in order to build a native iOS version of my web shopping list app
- Utilized redux-thunk middleware to handle authorization flow
- Used this project to introduce React-Native concepts as a presentation to a group of 40+ developers in November 2017

Should I Hike Today? Personally Developed Web App

September 2017

<https://should-i-hike.now.sh/>

- Utilized React lifecycle hooks to render a background change based on an asynchronous HTTP request to Wunderground's API

EXPERIENCE

AmeriCorps VISTA, Volunteer Coordinator

Aug 2016 — Dec 2016

- Created, implemented, and maintained a volunteer system for a non-profit through the federal AmeriCorps program
- Established networks by which we could recruit and retain volunteers

Tesla Motors, Store Coordinator

Aug 2015 — May 2016

- Worked to expand Tesla's marketing reach within the Mid-Atlantic region through events and physical presence
- Managed a fluctuating fleet of test drive and display vehicles
- Coordinated resources to ensure my sales team's success

EDUCATION

DevMountain, Phoenix AZ — Web Development

Aug 2017 — Nov 2017

Virginia Commonwealth University, Richmond VA — Forensic Chemistry

Aug 2012 — Dec 2014
